## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

Claims 1,6,7, 14-18,20-21,44,49-50,57-61, and 63-64 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In response to the previous office action, the applicant has amended the method claims and in doing so had introduced a new basis on which this 112nd is based. Claim 1 is directed to a method. The applicant has introduced the transitional phrase "consisting essentially of". That which follows a transitional phrase defines the scope of the claim. Here, what follows is a terminal and a plurality of servers. Thus the statutory class of the invention is unclear.

In addition, also in response to the previous office action, the applicant has amended a computer system for managing components to with the transitional phrase "consisting essentially of". Again that which follow is a plurality of terminals and a servers comprising a plurality of management protocol agent versions. First it is not clear which system component comprises this protocol. Moreover, as this is a system claim (a collection of components) the applicant should claim a component of the terminal of server that is programmed with said protocol agents. For example, the applicant can claim a server comprising a processor programmed with a plurality of management protocol agent versions, each for translating....

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Art Unit: 3693

Claims rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims include transitional phrase "consisting essentially of". That which follows a transitional phrase defines the scope of the claim. Here, what follows is a terminal and a plurality of servers. The claims however are directed to a method. Since all claims must fall into a single statutory class, the claims are rejected.
